Short Note

New Record of *Ophisaurus gracilis* (Reptilia: Anguidae) from Na Haew National Park, Loei Province, Thailand

The Asian glass lizard, *Ophisaurus gracilis* (Gray, 1845), is a limbless, terrestrial lizard that has been infrequently observed in northern Thailand during the past twenty years. It is reported to be a secretive, possibly burrowing lizard, which lives under logs and stones and feeds on insects, mollusks, and small vertebrates. Tikader (1967) reports death feigning during handling of this species. *Ophisaurus gracilis* is reported to occur from the Himalayan foothills of northern India and southern China and in northern Indochina at elevations over 1400 m. Brygoo (1987) reports specimens from 600 to 2000 m in Yunnan. Records of the species also exist for Sichuan Province in Central China and Xizang, Tibet. Campden-Main (1970) collected a single

specimen from Binh Dinh Province in South Vietnam. Three records exist for *O. gracilis* in northern Thailand: Chiang Mai, Doi Pha Hom Pok; Mae Hong Son, Pang Tong; and Loei, Phu Luang\(^1\) (Y. Chuaynkern pers. comm.).

On November 12, 2003 while trekking in Na Haew National Park, Loei Province, Amphur Na Haew, Thailand, I observed an *O. gracilis* in a bamboo forest at approximately 1000 m elevation. The lizard was active on the surface on the bamboo leaf litter and was easily captured by hand. Having no collecting permit I did not collect the animal but briefly examined and photographed it (Fig. 1). The specimen was approximately 35 cm in total length. Upon release, the lizard escaped by sliding down the hillside over the leaf litter. It did not retreat under the leaf litter.

Little is known about the ecology, distribution, and natural history of this interesting species and further study is warranted.

**ACKNOWLEDGEMENTS**

I wish to thank S. Sereesongsaeng, Supervisor of Na Haew National Park, for his kind hospitality during my visit to Na Haew. Thanks also to Y. Chuaynkern and K. Thirakhupt for information on the distribution of *O. gracilis* in Thailand and other help with the manuscript.
